Frameworks: Entity Framework, MVC, Vue Js, JQuery, JQuery UI, AJAX, Bootstrap, React.
Databases: SQL Server, MySQL, Oracle.
Technologies / Tools: Git, Azure Devops, Hangfire, Docker, SonarQube.
Practices: Agile, Scrum, Dependency Injections, Unit Testing, SOLID Principles.

Experience

Banco Santa Cruz

Remote

SENIOR SOFTWARE DEVELOPER

Aug 2023 – Present

- Led an application responsible for automatically sending fiscal receipts numbers to the Junta Central Electoral through scheduled jobs.
- Improved the algorithm that send to the api of 'Qualtrics', reducing 95% of the processing time.
- Suggested and implemented Docker for improved deployment of .NET applications

Banco Santa Cruz

Santo Domingo, DR

SENIOR SOFTWARE DEVELOPER

Jul 2022 – Apr 2023

- Developed a .NET Core 6 API enabling secure SMS-based access for bank customers to retrieve product information, enhancing their banking experience with operational deployment and account query functionality via message to 272.
- Developed a .NET Core 6 API for Visa payments using 3D Secure, optimizing transaction security and authentication by implementing internal business logic based on Visa specifications.

Cerveceria Nacional Dominicana (INBEV)

Santo Domingo, DR

INTEGRATION DEVELOPER

Mar 2021 – Jul 2022

- Led the development of a crucial .NET Core 3.1 API that provided comprehensive product information for the company, including beers, soft drinks, and more, executing essential business logic processes.
- Integrated data obtained from a warehouse into the company's microservice to update production information, ensuring seamless customer transactions for products like beers, soft drinks, and water.
- Enhanced frontend visuals (Vue.js) through screen creation and modification, ensuring alignment with project specifications provided by the scrum master.

Cerveceria Nacional Dominicana (INBEV)

Santo Domingo, DR

WEB DEVELOPER (BI)

Mar 2019 – Mar 2021

- Developed two websites using .Net Core, Vue Js, HTML, CSS, JavaScript and SQL Server.
- Managed diverse data sources to consolidate into a unified system, enhancing data accessibility.
- Automated daily ETL processes to extract data for financial visualization, transitioning from SAP to SQL Server via Pentaho.
- Developed an MVC application to visualize SAP data, facilitating manual adjustments before financial closures.

Banco Progreso Dominicano

Santo Domingo, DR

WEB DEVELOPER

Apr 2018 – Mar 2019

- Implemented an algorithm that significantly reduced application processing time from two days to just 45 minutes.
- Led MVC application to assist employees in identifying optimal candidates for new products based on credit information, streamlining customer outreach efforts.
- Developed comprehensive documentation for all implemented requirements, ensuring clarity and understanding across the organization.

Cerveceria Nacional Dominicana (INBEV)

Santo Domingo, DR

WEB DEVELOPER (BI)

Mar 2019 – Mar 2021

- Suggested and implemented a solution to streamline the ticketing system, reducing daily error volumes from 150-250 to 10-20.
- Created an API to provide real-time product information to the company's main branch in Mexico.

Projects

Loan Financial System

Asp.NET MVC, JQuery, HTML, CSS, Bootstrap, SQL Server

This versatile loan management system allows individuals and businesses to efficiently handle loan operations. With features like customizable payment schedules, fee management, and financial account integration, it provides a comprehensive solution for loan origination and management.
