Practices: MediaTR, CQRS, JWT, Agile, Scrum, Dependency Injections, SOLID Principles, Unit Testing(xunit, nunit), CORS, Memory Cache.

Experience

ThreatLocker *Orlando, United State*
FULL STACK DEVELOPER *Jun 2024 – Present*
- Developed and modified robust security measures to safeguard applications against cyber attacks, including intrusion detection, data encryption, and secure authentication protocols, ensuring comprehensive protection and compliance with industry standards.
- Worked with a variety of technologies, including Angular, ASP.NET, .NET Core, SQL Server, Git, and others.

Banco Santa Cruz *Remote*
SENIOR SOFTWARE DEVELOPER *Aug 2023 – Jun 2024*
- Led development of an application automating fiscal receipts submission to the Junta Central Electoral via scheduled jobs.
- Optimized API communication with Qualtrics, reducing processing time by 95%.
- Implemented Docker for improved deployment of .NET applications.

Banco Santa Cruz *Santo Domingo, DR*
SENIOR SOFTWARE DEVELOPER *Jul 2022 – Apr 2023*
- Developed a .NET Core 6 API enabling secure SMS-based access for bank customers, enhancing their banking experience with operational deployment and account query functionality via SMS.
- Designed and implemented a .NET Core 6 API for Visa payments using 3D Secure, optimizing transaction security and authentication based on Visa specifications.

Cerveceria Nacional Dominicana (INBEV) *Santo Domingo, DR*
INTEGRATION DEVELOPER *Mar 2021 – Jul 2022*
- Led the development of a crucial .NET Core 3.1 API providing comprehensive product information, executing essential business logic processes.
- Integrated warehouse data into company's microservice to update production information, ensuring seamless customer transactions.
- Enhanced frontend visuals (Vue.js) through screen creation and modification, aligning with project specifications.

Cerveceria Nacional Dominicana (INBEV) *Santo Domingo, DR*
WEB DEVELOPER (BI) *Mar 2019 – Mar 2021*
- Developed two websites using .NET Core, Vue Js, HTML, CSS, JavaScript, and SQL Server.
- Managed diverse data sources to consolidate into a unified system, enhancing data accessibility.
- Automated daily ETL processes to extract data for financial visualization, transitioning from SAP to SQL Server via Pentaho.

Banco Progreso Dominicano *Santo Domingo, DR*
WEB DEVELOPER *Apr 2018 – Mar 2019*
- Implemented an algorithm that significantly reduced application processing time from two days to just 45 minutes.
- Led MVC application to assist employees in identifying optimal candidates for new products based on credit information, streamlining customer outreach efforts.

Techcomm Wireless *Santo Domingo, DR*
WEB DEVELOPER *Feb 2017 – Abr 2018*
- Suggested and implemented a solution to streamline the ticketing system, reducing daily error volumes from 150-250 to 10-20.
- Created an API to provide real-time product information to the company's main branch in Mexico.

Projects

FoodCraft AI *React, Tailwindcss, Html, Css*

FoodCraft AI is a smart culinary assistant that helps you craft delicious meals effortlessly. Create food groups, input the ingredients you have on hand, and let our AI-powered engine suggest a variety of dishes you can prepare. Perfect for home cooks looking for inspiration or to make the most out of their pantry!
⚬ https://github.com/food-craft-AI

Loan Financial System *Asp.NET MVC, Jquery, HTML, CSS, Boostrap, SQL Server*

This versatile loan management system allows individuals and businesses to efficiently handle loan operations. With features like customizable payment schedules, fee management, and financial account integration, it provides a comprehensive solution for loan origination and management.
⚬ https://github.com/sistema-financiera

Money app *Vue Native, Expo*

This project is the copy to Cash app light.
⚬ https://github.com/MoneyApp

Restaurant System *Vue Js, Vuetify, Vue Router*

Optimized for efficiency, this application empowers administrators to seamlessly input and manage their menu offerings for swift sales transactions. Designed to cater to both take-out and dine-in orders, it streamlines the process for delivering exceptional service and convenience.
⚬ https://github.com/Restaurant-system

Restaurant System (API) *.NET Core, SQL Server*

This application serves as the backend for restaurant systems, efficiently managing data responses and facilitating seamless operations. Designed to enhance the restaurant experience, it ensures smooth communication and functionality within the system's infrastructure.
